

Morsø Forno - the flagship of the Morsø Outdoor Living Range the Forno has been designed to be the ideal choice for the family that values good food, unique design, originality and shared experiences. The Forno shuns pot-belly stove folksiness for a modern take on the kettle shape, and is an outdoor oven that offers endless opportunities for al-fresco dining. Prepare pizza, breads, and traditional barbeque food, all whilst enjoying the warmth that eliminates from this contemporary oven. The design on the Forno is based on the geometry and elements of a traditional Italian stove oven combining internally a circular stone platform with a wide low ceilinged firebox which generates heat for cooking, a small chimney and wide oval front opening. On the outside the stove is simple with a characteristic shape that can be readily placed either at ground level, for primary use as a fireplace, or sited onto the optional Oven Table which has been specially designed and raises the stove to working height in addition to supplying space to store spare firewood. The Forno is made from solid cast iron with a corrosion resistant coating system and has a ceramic stone base for even heat distribution and is wood fuelled. By pushing the wood aside space is cleared to bake, grill, smoke or slow cook a variety of meals. Cook a crispy pizza all the way to a delicious desert. <https://www.youtube.com/watch?v=kcrUDpOoJ98>.

FORNO SERIES SPECIFICATIONS

Height.....	606.4mm
Width.....	749.9mm
