

Morsø Grill Forno - the combination of cast iron, teak wood, and steel makes this Grill an original stand alone piece. The unit stands tall and proud on three beautiful newly designed wooden legs made from teak and a stainless steel ring holds the legs in place and provides three convenient hooks for storing your cooking implements. The grill is made from solid enamelled cast iron which gives unsurpassed advantages in connection with grilling. A coal insert and a grill grate comes with the Grill. The special surface of the grill grate has innumerable small pores that absorb the fat and flavourings from the meat. A unique feature which ensures that the meat is grilled in its own juices. Barbeque steaks, fish and vegetables are just a small example of foods that can be grilled to perfection using the cast iron grate. The grill does not just give the senses of taste and smell a treat, but completes the total experience with visual enjoyment through the wild play of the flames, enclosed in the cast iron cave. If you use the specially designed grill door, the oven will function as a ball grill, allowing slow roasting, baking and smoking. In addition to foods baking possibilities the Grill Forno can be used to create a small bonfire to provide warm cosiness in the garden, a terrace or a balcony. <https://www.youtube.com/watch?v=HW5VatdL6t8>.
