

Morsø Kamino - the new Morsø outdoor fireplace designed by award-winning Danish designer Klaus Rath. The Kamino is made of solid double coated cast iron, whose unique properties in relation to heat distribution, durability and design have made Morsø products well known and loved for generations. Coated with a heat and corrosion resistant coating-system, designed for extreme environmental exposures with a low maintenance consideration. With its ability to radiate heat much quicker than traditional wood burning fire pits, in addition to enhancing any outdoor space the Kamino can extend the usability of the patio, so that it can be used from the earliest months, on cool summer evenings and all the way into early autumn. The Kamino is also moveable and can be rotated to suit wind and layout, and with its chimney sprout, smoke will naturally move to higher elevations effectively preventing major smoke from coming back into your space. To add to its versatility the Kamino can be fitted with a Tuscan Grill and be used as an outdoor open barbeque. Food such as sausages, prawns and steaks can be grilled directly onto the Grill or alternatively a cocotte can be placed on top to roast meat and vegetables in your preferred liquid.

KAMINO SPECIFICATIONS

Height	1815.3mm
Width	340mm-450mm
Depth	500mm

Firebox Opening Dimensions

Height	293.6mm
Width	395.7mm
